PLAYING DEAD SPACE 2

ISAAC

In *Dead Space 2*, you join Isaac Clarke, the Systems Engineer from *Dead Space*, as he wakes up three years after the horrific events on the USG Ishimura. The Ishimura was a Planetcracker-class starship besieged by grotesque reanimations of its dead crew, known as "Necromorphs." After unearthing a strange artifact known as the Marker, Isaac finds himself on the Sprawl, a giant space station in orbit around Saturn. Unable to remember how he got here and plagued with demented visions of his dead girlfriend Nicole, he must survive another nightmarish outbreak of Necromorphs as he fights his way towards an answer he hopes will end all the chaos.

HUD

Dead Space 2 does not utilize a traditional heads up display to deliver vital information. Rather than using life meters or ammo counts, all of the information you need to know is displayed on-screen via a series of in-game indicators.

Foremost amongst the indicators is Isaac's RIG. The RIG is a part of Isaac's suit and provides valuable data via several signals. When all of the lights down Isaac's back are lit and blue, you are in good health. As the lights change to yellow and then red, you are losing health and close to dying. Find and use a med pack to heal yourself before it's too late. On Isaac's right shoulder is your current Stasis charge. As you use Stasis, this charge decreases. Recharge it with Stasis Packs. Stasis will also recharge slowly over time.

Your ammo is displayed on top of your currently equipped weapon when aiming. When this counter turns orange, you are running low on ammo and should reload. When the counter turns red, your clip is empty and you must reload. Isaac will reload automatically if he has another clip for that weapon. When there are red bars on the top and bottom of the counter, it means you have no more clips in your inventory.

RIG

Activate the RIG Holotech Inventory System to view an in-depth report on your progress and status. You can access the Inventory, Mission, and Database sub-menus from the RIG.

INVENTORY

View your weapons, key items, suit status, number of nodes, and credits from the inventory. You can use (when available) or drop items from this menu, as well. Dropped items will appear in the world and can be picked up again if desired.

MISSION

View your current objectives and personal journal. Completed objectives are highlighted in green, while incomplete ones remain blue. Highlight an objective to view further details, when available.

DATABASE

Listen to the audio and video transmissions you have picked up over the course of the game, sorted by chapter.

TUTORIALS

You may view tutorials to familiarize yourself with vital game mechanics.

ZERO-G

Occasionally, you will be required to take part in zero gravity activities. In zero gravity action, you will float above the ground and be able to maneuver in all directions. Moving forward, backward, and sideways works just as it does under standard gravity, but you now have the ability to essentially "fly" upwards or down. In combat situations, take advantage of your newfound mobility by locating new vantage points to take on the Necromorphs from relative safety. You can also use Boost to move quickly in situations where speed is preferable to control. If you get disoriented, press Left Shift/Right Shift to re-orient yourself so your head is up relative to the floor.

WEAPONS

In order to survive in *Dead Space 2*, your most effective technique is to strategically dismember your enemies. Use these weapons to get the job done.

PLASMA CUTTER

This high-energy mineral cutter is the first weapon you find and one of the most reliable. Activating the alt-fire alters the angle of the energy that it fires, so it can be fired horizontally or vertically. Use the alt-fire to efficiently sever specific limbs from your enemies.

LINE GUN

This wide-beamed slicer does a fantastic job of severing limbs. It slowly travels in a straight line after being fired, and can pass through enemies to hit those behind the target. Activating its alt-fire sends a timed mine into the field. After a few moments, it blinks and explodes, destroying anything in the surrounding area.

PULSE RIFLE

This military-grade assault rifle has a high rate of fire. Use this weapon when facing several enemies at once. With careful application of firepower, this weapon can clear a hallway in seconds. The alt-fire is a grenade launcher.

JAVELIN GUN

The Javelin Gun uses javelins for penetrative survey work. These javelins pierce and impale enemies, and using the alt-fire causes an electrical shock to be activated from the last javelin fired.

FLAMETHROWER

This Hydrazine industrial torch's commercial uses have fallen by the wayside, but the flamethrower is remarkably effective against enemies. The alt-fire launches a lit fuel canister a short distance, which then explodes after a brief delay. New mining technology allows airless use.

SEEKER RIFLE

The Seeker Rifle is a riot control device that is meant for accuracy at long-range. It packs a punch but is slow to reload. Use the alt-fire to zoom in with the scope for even greater damage.

DETONATOR MINES

Detonator Mines are sensor-tripped mining charges that can be placed onto any surface. Activating the alt-fire deactivates the charges, allowing them to be safely retrieved for later use.

FORCE GUN

The Force Gun is a short-range kinetic booster device that was used originally for clearing surfaces of dust and debris in the vacuum of space. Use the alt-fire to activate a focused force beam that can rip the limbs off almost anything.

CONTACT BEAM

A heavy-duty energy pulse device, the Contact Beam is used for commercial destruction where a powerful but focused explosive force is needed. The alt-fire delivers a ground-clearing blast around the user.

RIPPER

The Ripper uses a built-in TK module to project and hold a circular titanium saw blade spinning at high RPM in front of the user, useful for all cutting jobs, delicate or otherwise. Alt-fire ejects the blades in a straight line for long-distance cutting.

SUITS

All the suits are intended to mitigate the dangers of working in space, and enable the wearer to survive for varying lengths of time in raw vacuum. All of the suits are equipped with maneuvering thrusters for use in zero gravity conditions and carry 120 seconds of breathable air, minimum. The suits vary in their inventory capacity, damage protection, and special properties. Certain suits even have bonuses.

CEC ENGINEERING SUIT

This basic suit covers all the needs of the space-faring engineer. Its ribbed armor offers damage protection of 5% and has space for 10 items.

EARTHGOV SECURITY FORCES SUIT

This suit features lightweight state-of-the-art protective armor, and is resistant to concussive damage and lacerations. It offers damage protection of 10% and can carry 15 items. As a bonus, your Pulse Rifle receives a 5% damage increase.

CEC VINTAGE SUIT

The Vintage suit is a beloved throwback to the days when protective materials relied on mass rather than technology. Sturdier than even modern suits, it offers damage protection of 15% and can carry 20 items. As a bonus, you receive a discount of 10% on all items in the Store.

ADVANCED PROTOTYPE SUIT

The Advanced suit relies on classified technology and is intended for elite forces in dangerous situations in the harshest of environments. It has damage protection of 20% and can carry 25 items. As a bonus, your Stasis recharge time is decreased by 10%.
