## Important Health Warning About Playing Video Games

### Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions: Sit farther from the screen; use a smaller screen; play in a well-lit room; and do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

### What is the PEGI System?

The PEGI age-rating system protects minors from games unsuitable for their particular age group. PLEASE NOTE it is not a guide to gaming difficulty. Comprising two parts, PEGI allows parents and those purchasing games for children to make an informed choice appropriate to the age of the intended player. The first part is an age rating:

The second is icons indicating the type of content in the game. Depending on the game, there may be a number of such icons. The age-rating of the game reflects the intensity of this content. The icons are:

## BASIC TECHNIQUES

### SERVING

1. Use the left stick to set your start position and press a shot button to begin the Serve Gauge.
2. Hold the left stick in the direction you wish to serve. Take care as holding it too long will cause the ball to fault.
3. Press the shot button again so that the Serve Gauge stops on Max. The closer it is to Max, the stronger the serve will be. Pressing the shot button while the gauge is raising will result in a slice serve; pressing it while the gauge is dropping will result in a spin serve.

### RETURNING SHOTS

#### 1. Approach the ball

As the ball is returned by your opponent, try to anticipate where it will arrive in your own court and run quickly to that position. Your shot type and footing will vary depending on your position relative to the ball.

#### 2. Press the Shot Button

Press the shot button to start your swing. The length of time between starting your swing and hitting the ball will determine the shot's power. Additionally, the shot type will vary depending on the shot button used (see Shot Types).

*Press early for greater power*

#### 3. Set the Direction

After pressing the shot button, use the left stick to determine the shot's direction. The direction will become more extreme the longer you hold the left stick.

## SHOT TYPES

### Top Spin (Regular Shot)

Press the A button for a regular shot applying top spin.

### Slice (Defensive Shot)

Press the X button for a slice shot when you're in a tight spot. The speed is slow, but gives you time to regain your footing.

### Lob

Press the Y button for a lob shot that goes straight over your opponent's head when they're near the net.

### Drop Shot

Push the Y button together with the left stick down for a drop shot. This allows you to return the ball close to the net in your opponent's court.

### Smash

If you're positioned such that the ball reaches you before it bounces, you can automatically volley it back. High balls sent over your head can be smashed back into the opponent's court.

### Super Shot

As each match progresses, your concentration gauge (shown top left/right of screen) will build. Once full, push the B button to unleash a special high powered Super Shot unique to the individual player that will give you a competitive advantage.

## HITTING HARD SHOTS

### 1. Aim for the peak of the bounce

By aiming for the ball while at the peak of its bounce (high shot point), you can return it with greater force.

High shot point

### 2. Anticipate the ball's arrival and swing early

Position yourself where you think the ball will arrive and start your swing early to build a more powerful shot. Take care, for if you fail to predict the ball's arrival correctly, your shot will be weak.

Low shot point

**Good.** A well anticipated ball is met by a powerful swing

**Bad.** Poor anticipation leads to a weak return or missed shots

## **MATCH MOMENTUM**

The Match Momentum system is a new feature of *Virtua Tennis 4*, which increases the dynamism and excitement of tennis play allowing you to get further immersed in the match fury. The level of Match Momentum at any given time is shown as a concentration gauge at the top left and right (opponent) of the game screen.

**Match Momentum is built according to your character's Play Style.** Each Play Style has its own conditions for increasing the concentration gauge, which are outlined in the Play Style descriptions in My Club (p.18).

**As the concentration gauge increases, your character's abilities will be enhanced.** Gradually unlock additional special shots and moves over the course of the match for advantageous play.

**Fill the concentration gauge to unlock Super Shot.** Push the Super Shot button and watch the performance unfold dramatically before your eyes.

- \* The Super Shot button can be pushed at any time once the concentration gauge is at full.
- \* After the gauge reaches full, it will slowly reduce over time. Unleashing the Super Shot will reduce it to zero immediately.

## WORLD TOUR

Fight your way through four tough seasons with your eyes fixed on winning the grand slam championship. To reach the top, it's necessary to first build your reputation. Whether it be taking part in matches, mingling with fans, or making volunteer contributions, everything you do will have an effect on your ratings, so choose your actions wisely. With careful planning, you can make your name in the world of tennis.

### STARTING THE WORLD TOUR

Begin by selecting or creating a character.

To create a character, select an empty slot to proceed. Selecting a slot with an existing character will allow you to continue that character's career from where you left off.

#### CREATING A PLAYER CHARACTER

At the Player Registration screen, select a difficulty level before progressing to character design. Over the next set of screens, you can create your player character's likeness, just the way you want it.

**Profile:** Set the character's gender, name, date of birth and nationality.

**Basic Player:** Choose a template body from which to begin your customisation.

**Player Customisation:** Customise the Body Type, Face and Hair. The possible customisations are endless!

Finally select **Ready** to complete the character design and begin the tour!

#### GAMEPLAY SYSTEM

Your tour begins in Tokyo, Japan. From here you will progress along an occasionally forking path around the world one day at a time. When you're ready to proceed, select a numbered ticket from those available to progress to your next destination; the number on the ticket determines how many spaces you will move, and the space you land on determines your activity for that day. Some spaces have a training activity; some have an event you can participate in; some have a rest stop to replenish your energy; some have nothing at all. You can view a road map ahead, so plan wisely to ensure you are able to carry out the activities you want to. And don't worry, you won't be alone; your coach will be there to support you every step of the way!

## SCHEDULING MENU

This screen gives you an overview of your progress. Here you can see how many days are left to the end of the season, and details of the next Big Tournament including your entry status.

The scheduling menu allows you to select from the following:

- **MOVE** Enter the Map Screen and select a ticket for your next destination.
- **VIEW MAP** Take a look at the road ahead to plan your activity schedule.
- **SPT RATING** See how you rank against the other players.
- **MY CLUB (P.18)** Customise your character's Play Style, clothing and equipment, and select doubles partners.

## ACTIVITIES

Each activity is shown on the map as an icon. A selection of the icons and corresponding activities are detailed below.

### TRAINING

Essential for building up your skills as a player. Most will not affect your Stars, but will take a toll on your condition.

There are 8 different training activities which are substantially identical to the Party mode games detailed on p.15. Each training activity has its own unique icon, but all are coloured blue for easy identification.

### EXHIBITION

A well played match will increase your Stars, but will also take its toll on your condition.

There are three kinds of exhibition matches; practice matches can be identified by the yellow tennis racket icon (a single racket for a singles match, and two crossed rackets for a doubles match), special matches identified by a crown icon; and fancy dress matches identified by a face disguise.

### REST

It's important to stay in tip-top condition. If your condition starts getting low, stop at a rest stop to recuperate.

Rest stops can be identified by the green deck chair icon.

### MANAGEMENT OFFICE

Here you can perform a number of administrative tasks such as purchasing a single stop ticket, and hiring a publicity manager to work with you.

Management offices are identified by the purple office icon.

### PUBLICITY

Regularly taking part in publicity work and charity events can do wonders for your rating. They can also become expensive, so watch your funding!

Publicity Works are identified by a icon showing a small crowd in yellow, and Charity Events a yellow t-shirt.

## ACCIDENTS

These reduce your Stars, condition and money. Try to avoid landing on these.

Accidents are identified by red downward pointing arrows.

## TOURNAMENT

These are where you get to really show your tennis skills, if you're qualified to enter. Expect rewards of both cash and SPT rating, but watch your condition.

Satellite tournament icons are similar in design to the practice matches. Other tournament icons come in a variety of designs.

## SPT RATING

As your rating improves, you will gradually work your way up the SPT Rating. You can check your current position by selecting SPT Rating at the Scheduling Menu.

## DOUBLES PARTNER

As your tour progresses and your reputation improves, more and more players will want to join you as partners for doubles matches. Each will have their own strengths and weaknesses, so decide who you'll be paired with at doubles tournaments and practices by selecting My Club (p.18) from the Scheduling Menu, and then choosing Doubles Partner. Early in the tour, only one partner will be available, and is selected by default.

## CONDITION

Your current physical condition is shown as a gauge at the top of the Move screen. Different activities have different effects on your condition, as can be seen from the activity information box at the Map screen; an arrow pointed downwards shows a lowering of condition, and an upward pointed arrow shows a recovery. A dash indicates a negligible impact. The degree of change is also indicated by the number of arrows.

If your condition gets low, then your match performance may suffer. Letting your condition drop to zero will result in an injury that will take several days out of your schedule to recover from. Stopping at rest stops regularly will keep in the best shape. Performing well at training can also increase the upper limit of your condition meaning less rest stops are required.

## ARCADE/EXHIBITION

Both of these modes allow you to practice and enjoy your tennis skills in regular matches. **Arcade** lets you jump straight into the action and enjoy a series of matches, whereas **Exhibition** lets you play a single match exactly to your liking with friends or alone.

On selecting either of these modes, you will be presented with the following options. Note that selections are more limited for Arcade.

<b>Match Type</b>	Set to <b>Singles/Doubles</b>
<b>Number of Players</b>	Arcade: <b>1/2</b> (doubles matches only) Exhibition: <b>1/2/3/4</b>
<b>Game/COM Level</b>	Set to <b>Easy/Normal/Hard/Very Hard</b>
<b>Court</b>	Choose a venue from the courts available (Exhibition only)

### ADVANCED SETTINGS (EXHIBITION ONLY)

<b>Number of Games</b>	Set up to <b>6</b> games per set
<b>Number of Sets</b>	Set <b>1/3/5</b> sets per match
<b>Tie Break</b>	Decide a winner by tie break in case of a tie
<b>Server</b>	Set the court serving first to <b>Front/Back/Random</b>

### POSITION SELECT

Use the left stick or directional pad left/right to choose a position for each player. In Arcade, this is only available for doubles matches.

### CHARACTER SELECTION

Choose from one of the professional players available, or to play as one of your custom World Tour characters select **Load** (choose a character) or **Current** (most recently played World Tour character). Different players have different strengths, so choose carefully.

After you have made your choice, you can then go on to select characters for your doubles partner and opponents (Exhibition only).

## PARTY

Enjoy a selection of tennis themed party games with friends or alone. Set the number of players and choose a game and click **Ready** to progress to the Character Selection screen as detailed on p.14. Once player selection is completed, the selected game will begin.

### Clay Shooting

Break as many clay targets as possible with well-aimed shots. Score extra points by breaking stacked targets with one shot. When you're running low on targets, break a red target to restock. Gold targets are worth more points.

### Ace Striker

Take serves at a soccer goal and earn points for scoring. White-coloured defenders can be blown away with strong serves. You can earn more points by scoring goals in succession.

### Egg Collector

Touch the eggs on the court to make them hatch, and then guide as many chicks as possible to the mother hen. The chicks follow you, so try to steer them away from balls. The more you guide to safety simultaneously, the higher your score.

### Royal Poker

Flip cards over by hitting them with balls, and put together poker hands. The higher the hand, the higher the score. Aim for lit-up cards to efficiently build hands.

### Wind Match

Keep a rally going with your opponent on a windswept court. More points are added as you keep the rally going. But watch out: hitting a balloon on the court makes the wind's direction change.

When playing with two or more players, the side that wins the rally receives the points.

### **Bomb Match**

Rally using bomb balls that count down with every hit. Drop the counts to zero and make them explode on your opponent's side of the court. Hitting bombs onto the circles on the court will speed up the countdown, so use that to your advantage.

### **Wall Match**

Sliding wall panels atop the net impede regular play. You can move them up and down by stepping on correspondingly-coloured switches on the court. They can bounce the ball back when up. The more panels up when a point is scored, the higher the bonus.

### **Coin Match**

Collect the coins that appear on the court. Large coins score higher. You can make more coins appear by scoring points off your opponent.
